EXPERIENCE

Aseguradora Guatemalteca, Guatemala, zone 10 — *Programmer analyst*

- scalable backend architecture integration in angular.
- Maintenance of components in angular.
- DevOps automation with Golang

Nov 2021 - present

EDUCATION

Galileo University, Guatemala — *Systems engineering and computer science*

Jan 2022 - Present

Kinal foundation, Guatemala — *Technician in industrial electronics*

JAN DE 2019 - NOV DE 2021

PROJECTS

Seli — *Bot/Backend.*

The implementation of a bot and a backend in typescript using express. We ran into the inconvenience of how to notify the user of various problems when using the bot, so I came up with the use of redis to implement queues using the producer–consumer pattern

Compilers and Interpreters

It's not a very big project, but in my spare time I really like to play with low level stuff and currently I'm very focused on the world of compilers and interpreters and I would like to go deeper and dedicate full time to it.
